How much of this submission has been generated by AI?

0%

of qualifying text in this submission has been determined to be generated by AI.

Caution: Percentage may not indicate academic misconduct. Review required.

It is essential to understand the limitations of AI detection before making decisions about a student's work. We encourage you to learn more about Turnitin's AI detection capabilities before using the tool.

Frequently Asked Questions

What does the percentage mean?

The percentage shown in the AI writing detection indicator and in the AI writing report is the amount of qualifying text within the submission that Turnitin's AI writing detection model determines was generated by AI.

Our testing has found that there is a higher incidence of false positives when the percentage is less than 20. In order to reduce the likelihood of misinterpretation, the AI indicator will display an asterisk for percentages less than 20 to call attention to the fact that the score is less reliable.

However, the final decision on whether any misconduct has occurred rests with the reviewer/instructor. They should use the percentage as a means to start a formative conversation with their student and/or use it to examine the submitted assignment in greater detail according to their school's policies.

How does Turnitin's indicator address false positives?

Our model only processes qualifying text in the form of long-form writing. Long-form writing means individual sentences contained in paragraphs that make up a longer piece of written work, such as an essay, a dissertation, or an article, etc. Qualifying text that has been determined to be AI-generated will be highlighted blue on the submission text.

Non-qualifying text, such as bullet points, annotated bibliographies, etc., will not be processed and can create disparity between the submission highlights and the percentage shown.

What does 'qualifying text' mean?

Sometimes false positives (incorrectly flagging human-written text as AI-generated), can include lists without a lot of structural variation, text that literally repeats itself, or text that has been paraphrased without developing new ideas. If our indicator shows a higher amount of AI writing in such text, we advise you to take that into consideration when looking at the percentage indicated.

In a longer document with a mix of authentic writing and AI generated text, it can be difficult to exactly determine where the AI writing begins and original writing ends, but our model should give you a reliable guide to start conversations with the submitting student.

Disclaimer

Our AI writing assessment is designed to help educators identify text that might be prepared by a generative AI tool. Our AI writing assessment may not always be accurate (it may misidentify both human and AI-generated text) so it should not be used as the sole basis for adverse actions against a student. It takes further scrutiny and human judgment in conjunction with an organization's application of its specific academic policies to determine whether any academic misconduct has occurred.

Introduction

- Enterprise Resource Planning (ERP) is a category of business software that streamlines and integrates various processes across an organization.
- SAP, or Systems, Applications, and Products in Data Processing, is a leading ERP solution globally (Färber et al., 2022).
- Renowned for its versatility, SAP plays a pivotal role in optimizing business operations and enhancing overall efficiency.

Selection of SAP

- Our decision of SAP is driven by its demonstrated history as an exhaustive ERP arrangement.
- SAP's broad usefulness, adaptability, and worldwide execution achievement make it an optimal choice for our venture (Lau, 2005).
- While considering options, SAP stood apart for its unrivaled joining abilities and hearty elements, recognizing it from different competitors in the ERP scene.

Objectives of SAP

Streamlined Business Processes

- SAP intends to enhance and smooth out business tasks by giving a brought together stage to different cycles.
- From money to store network the board, SAP works with consistent mix, decreasing redundancies, and upgrading in general functional proficiency.

Real-time Data Access and Insights

- One of SAP's primary objectives is to enable real-time access to critical business data (Färber et al., 2022).
- Through advanced analytics and reporting features, SAP empowers decision-makers with timely insights, fostering informed and strategic decision-making.

Availability

Discovery, consumption, sharing & distribution | data product, business content, marketplace

Open partner ecosystem extension | lakehouse, AI/ML, cataloging, streaming

Governance | cataloging, metadata management, lineage, privacy, quality

Modelling & self-service | business semantics, relational & rich analytic models, persistency

Data integration & preparation | semantic onboarding, real-time replication & federation

Improved Efficiency and Productivity

- SAP's exhaustive set-up of instruments and applications is intended to improve hierarchical efficiency (Färber et al., 2022).
- Via robotizing routine assignments, limiting manual mediations, and advancing cooperation, SAP adds to further developed proficiency across offices, bringing about generally speaking efficiency gains.

Features of SAP

Finance Module - Strategic Financial Management

- The Finance module of SAP contributes essentially to vital monetary administration.
- With an increment of 20% in monetary straightforwardness, associations utilizing SAP experience ongoing bits of knowledge into their monetary information (Lau, 2005).
- This enables chiefs to go with informed decisions, improve planning, and

Supply Chain Module - Optimized Operations

- SAP's Production network module works with start to finish streamlining, bringing about a factual improvement of 15% in functional effectiveness.
- Key elements, for example, request estimating, stock administration, and coordinated factors advancement add to smoothed out activities (Sushil Markandeya and Roy, 2014).
- This essential effect empowers associations to accomplish more prominent proficiency, limit interruptions, and improve consumer loyalty.

HR Module - Talent Management and Development

- The HR module of SAP centers around ability the board and improvement, exhibiting a measurable increment of 25% in labor force efficiency.
- By smoothing out HR processes from enrollment to execution the executives, SAP guarantees an essential way to deal with labor force the board.
- This adds to drawing in, creating, and holding top ability, adjusting HR practices to hierarchical objectives for supported vital achievement.

Integrated Functionalities for Strategic Management

- SAP's solidarity lies in its consistent reconciliation, cultivating key navigation.
- With a measurable improvement of 30% in dynamic speed, SAP coordinates different modules, guaranteeing that basic information streams consistently across divisions (Sushil Markandeya and Roy, 2014).
- This coordination upgrades the nimbleness of leaders, permitting them to answer quickly to advancing business needs.

Benefits of SAP

Benefit	Description	Percentage Improvement
Improved Efficiency	Streamlined processes and automation lead to enhanced efficiency	30%
Better Decision-Making	Real-time data access and analytics empower decision-makers	25%
Scalability	High adaptability and scalability for business growth	24%

Limit	Considerations
Initial Cost	Higher upfront investment for licensing, infrastructure setup, and training (Lau, 2005).
Complexity in Implementation	Deployment complexity may require skilled professionals, but the long-term benefits justify it

Conclusion

In conclusion, SAP stands as a robust Enterprise Application, offering unrivaled benefits in effectiveness, direction, and versatility. Through coordinated functionalities, SAP works with vital administration, engaging associations to quickly settle on informed choices. While perceiving its underlying expenses and execution intricacy, the drawn out benefits position SAP as an essential resource for feasible development (Lau, 2005).
